Who we are

The largest national anatomic pathology company in Brazil

The Erviegas Group operates with a solid and consolidated presence in the Pathological Anatomy market. We seek to provide the best diagnostic experience to laboratories, thus improving the quality of the exams performed.

Our constant search for excellence has made us a national reference in biotechnology. We lead the national manufacturing of inputs for pathological anatomy, redefining the future of the sector

We have an exclusive business model that allows us to be present at all stages, from manufacturing to final diagnosis, integrating our operations to optimize our processes and offer efficient solutions to our customers

Our products and services stand out for their agility, quality, sustainability and effectiveness. We highlight the brands EasyPath®, which offers specialized solutions in histology, and CytoLiq®, exclusive for cytological products, in addition to advanced diagnostic equipment to meet the needs of your laboratory.

Count on us to boost your laboratory, guided by fundamental values such as respect for transparency, teamwork and balance between results and ethics. Together, we can promote health and well-being through increasingly accurate and rapid diagnoses, providing a positive impact on people's lives.

CYTOLIQ

THE BEST DIAGNOSIS FOR WOMEN'S
HEALTH AND WELL-BEING

Migrate your conventional routine to

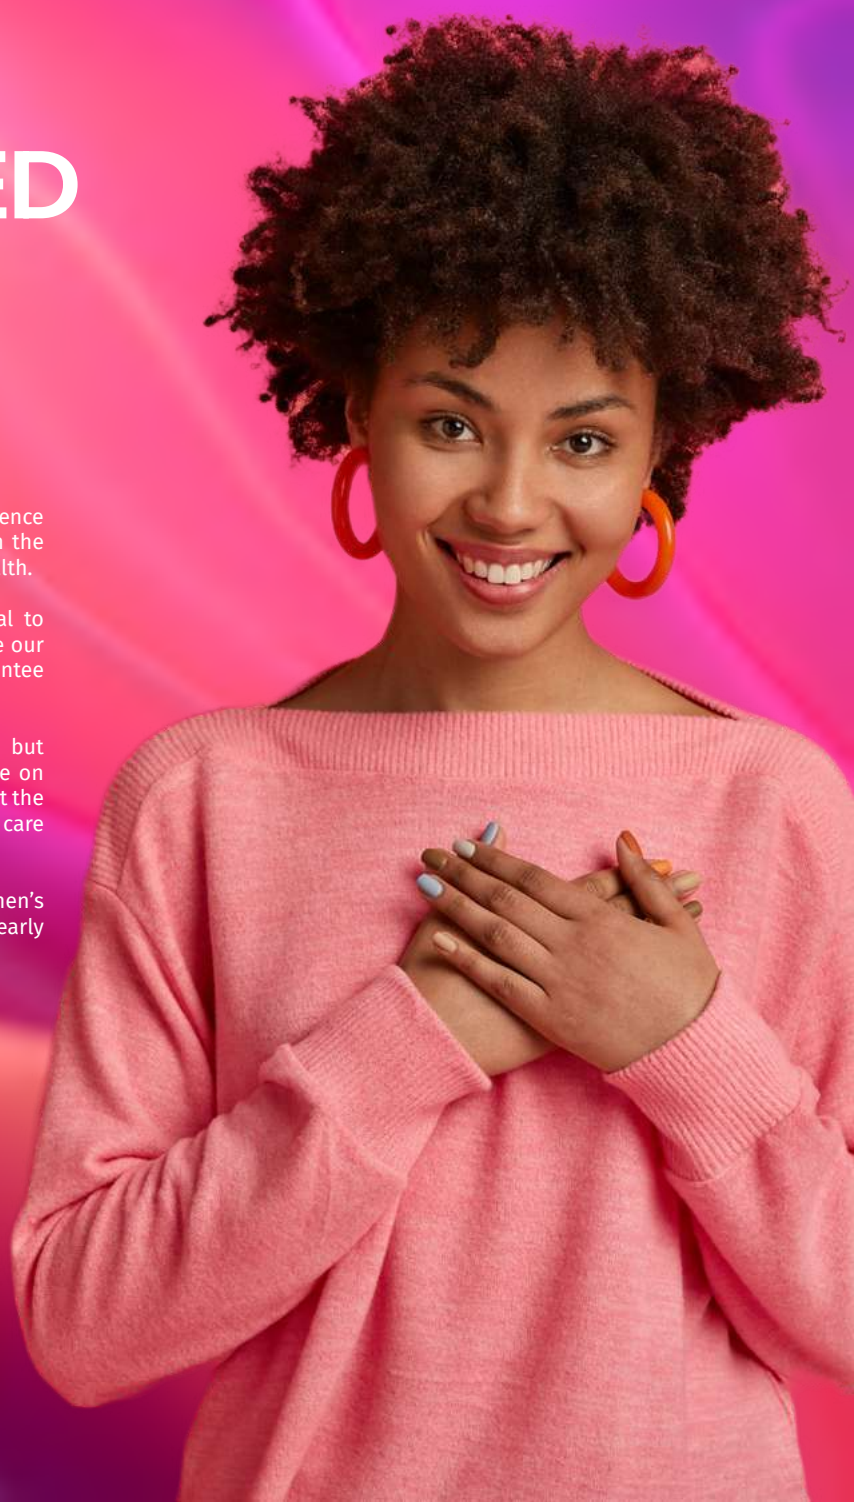

LIQUID-BASED CYTOLOGY TODAY

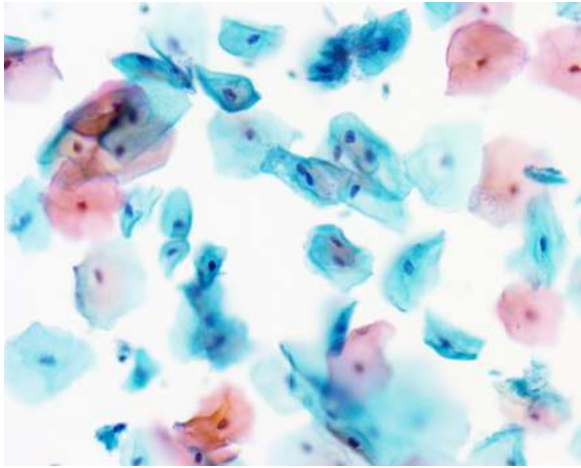

CYTOLIQ® is more than a brand; it is a commitment to excellence in liquid-based cytology. Our goal is to be the reference in the field of early diagnosis, directly contributing to women's health.

We believe that every test, every result, has the potential to make a difference in women's lives. That is why we dedicate our expertise and resources to developing products that guarantee accuracy and reliability in their diagnoses.

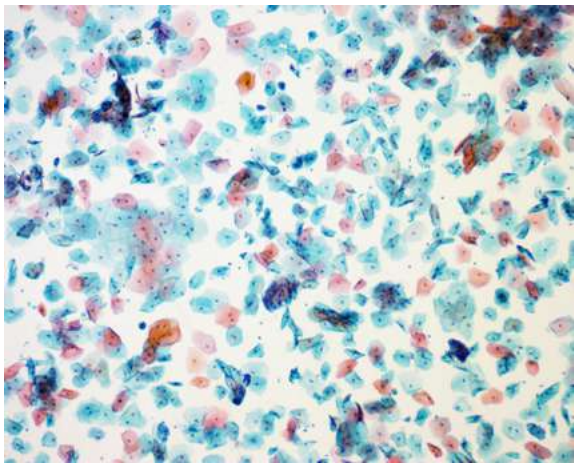

At CYTOLIQ®, we not only provide high-quality products, but we also care deeply about the positive impact we can have on women's health and well-being. We are committed to being at the forefront of innovation, so that every woman can receive the care she deserves, with maximum precision and efficacy.

Join us on the journey to promote stronger, more vibrant women's health. With CYTOLIQ®, we are building a future where early diagnosis is a reality accessible to all women.

Equipment for Liquid-Based Cytology

We combine research and cutting-edge technology to offer quality equipment for your diagnostic routine.

Equipment - Manual Method

CYTOLIQ SPIN 450

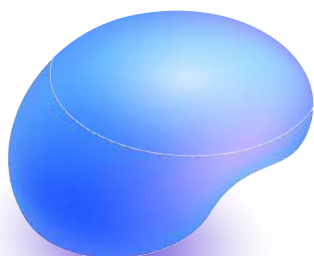

The CytoLiq Spin 450 benchtop centrifuge from Cytolig is a modern and precise piece of equipment, developed based on research and expert opinions. It has a low noise level, LED panel, adjustable speed from 10 to 4500 rpm and centrifugation time from 0 to 99 minutes. It offers the option of centrifugation by RPM or RCF and comes with several fixed (vertical) or variable (horizontal) rotors with tube capacities from 5 to 50 ml. 12-month warranty against manufacturing defects, with permanent technical assistance.

Technical Specifications

Voltage	BIVOLT
Pipe Capacity	from 5 to 50ml
Speed	min of 10rpm and max of 4500rpm
Spin Time	0 to 99 minutes
Rotation Option	RPM (4500) or RCF (2850xg)
Rotor Types	Fixed (vertical) or variable (horizontal)
Plate Capacity	Up to 96 wells
Noise Level	<65db
SKU	CY-31-20656
Brand	CYTOLIQ

QUICK QUOTE

CYTOLIQ SPIN 500

The CytoLiq Spin 500 benchtop centrifuge from Cytolig is a modern and precise piece of equipment, developed based on research and expert opinions. It has a low noise level, LED panel, adjustable speed up to 5000 rpm and centrifugation time from 0 to 99 minutes. It offers the option of centrifugation by RPM or RCF and comes with several horizontal rotors with tube capacities from 5 to 100ml, as well as plates of up to 96 wells. 12-month warranty against manufacturing defects, with permanent technical assistance

Technical Specifications

Voltage	220V
Capacity	8 tubos de 5 a 50ml
Speed	até 5000rpm
Spin Time	0 a 99 minutos
Rotation Option	RPM (5000) ou RCF (4980xg)
Pipe Capacity	De 5 a 100ml
Plate Capacity	Up to 96 wells
Noise Level	<65db
SKU	CY-31-20657
Brand	CYTOLIQ

Equipment - Cytocentrifuge

CYTOCENTRIFUGE - CLIP3

The CytoLiq Clip 3 Cytocentrifuge is a modern and easy-to-use benchtop equipment, designed to offer efficiency and practicality in centrifugation procedures. With a low noise level and LED panel, it provides a comfortable and intuitive user experience.

QUICK QUOTE

Technical Specifications

Supply Voltage	Dual voltage (110x240V)
Speed	10 to 3000 rpm
Time	10 seconds to 99 seconds
Centrifugation Options	RPM (3000) or RCF (730xg)
Rotor Capacity	Six 0.5ml Cytofunnel (C-41-20731)
	Twelve 2ml Cytofunnel (CY-41-20732)
Guarantee	12 months against manufacturing defects
Technical Assistance	Permanent
Rotor	Not included
SKU	CY-31-20659

Cytofunnel, filters and rack

The CytoLiq Clip 3 cyto-centrifuge has two volume options for performing cyto-centrifugation according to the user's needs, with a capacity of 0.5 or 2.0 ml.

The 0.5 ml cytofunnel is used in the rotor with a capacity of 6 units. It has a pressure O-ring that ensures a seal between the funnel, filter paper and the slide. This cytofunnel can be reused several times and must be cleaned by the user. However, it is not autoclavable.

There is also the option of the 2.0 ml cytofunnel, for use in the 12-position rotor. This cytofunnel has an internal filter between the sample and the slide. It is for single use and must be discarded after use.

CYTOFUNNEL AND FILTER 0.5ML

Equipment - Semi Automatic Method

IMPRESS ONE

CYTOLIQ - IMPRESS ONE

The Cytoliq Impress One is an innovative semi-automatic processor for liquid cytology exams. With a touch screen panel and exclusive double membrane filter, it offers high productivity (90 slides/hour) and quality. Compact (0.7 kg) and versatile, it allows exams in different samples and locations. Durable and low maintenance, it is the complete solution for diagnostic laboratories.

90 SLIDES PER HOUR

Technical Specifications

Voltage	BIVOLT
Capacity	1 slide at a time
Dimensions	25 x 20 x 33cm
Weight	0,7Kg
LED Touch Panel	Yes
SKU	CY-31-20651
Brand	CYTOLIQ

QUICK QUOTE

IMPRESS DUO

CYTOLIQ IMPRESS DUO

Cytoliq Impress Duo, higher productivity processing 2 slides at a time, 140 slides per hour. Double filtration system: Filter 1 (Macro): removes unwanted artifacts and Filter 2 (Nano) separates only the cells to be analyzed and performs the "imprint" on the slide.

140 SLIDES PER HOUR

Technical Specifications

Voltage	BIVOLT
Capacity	2 slides at a time
Dimensions	33,2 x 25,5 x 46,5
Weight	16Kg
Painel LED Touch	Yes

Filters for Liquid-Based Cytology

1ST FILTERING

2ND FILTERING

CYTOFILTER DUO

The DUO FILTER is a double membrane filter for liquid-based cytology.

It has two filters: the 1st filter (Macro), which retains mucus, blood and other artifacts that are not relevant to the exam, separating the epithelial cells; and the 2nd Filter (Nano), which is a water filter with a membrane to print the slide with high cellularity to ensure more efficient isolated fixation (monolayer).

Compatible with systems: Gynoprep

SKU	CY-41-20672
Quantity	Package with 50 units
Brand	CYTOLIQ

QUICK QUOTE

CYTOFILTER FLEX

Filter for liquid-based cytology, made of translucent plastic in a cylindrical shape, has a disposable filter membrane, compatible with TPK Fênix and Thinprep 2000 systems.

SKU	CY-41-20641
Quantity	Pack of 50 Filters
Brand	CYTOLIQ

Cervical Collection Brush - CYTOPRO

CYTOPRO

CYTOPRO - CERVICAL BRUSH

CYTOPRO was designed with fine, delicate arrow-shaped bristles to provide greater comfort and efficiency when collecting cells.

CYTOPRO has a detachable tip, ensuring that all collected cells remain in the preservation medium until analysis, and performs collection in a single way, eliminating the need for an Ayres spatula or a pine brush.

SKU	CY-41-20671
Quantity	Box with 50 units

COMPARATIVE

AYRES CONVENTIONAL BRUSH

- Polypropylene bristles
- Low cell concentration on the blade
- May cause bleeding in the patient
- Not for use in pregnant patients
- Should not rotate more than once
- Collection in two stages:
 - 1st Pinheiro/Endocervix
 - 2nd Ayres Spatula/Ectocervix

CYTOPRO

- Polyethylene bristles
- High cell concentration on the blade
- Much more comfort for the patient
- Can be used on pregnant patients
- Must rotate 5x for ideal collection
- Endocervical and Ectocervical collection in a unique way
